

V1.4 23-04-2019

All heavy goods vehicles with a Gross Vehicle Weight of more than 3.5 tonnes (since 1 April 2016), as well as all semi-trailer tractors of the N1 category with a body code BC regardless of their weight (since 1 January 2018), must pay a kilometre charge in Belgium. This regulation applies on motorways and several regional and municipal roads. In order to comply with Belgian toll regulations, you need to register your vehicle on the Satellic Road User Portal (RUP) or at a Service Point. This document informs you about the documents you will need for your registration.

You will find the following information:

•	The data you have to register	2
	Where to find the data	
•	The documents that Satellic accepts as proof	6

Introduction

When registering a vehicle on the Satellic Road User Portal (RUP) or at a Service Point you will be asked to:

- a. Provide certain data about your vehicle
- b. Upload or scan all of the relevant vehicle documents

This document displays the vehicle documents that Satellic accepts as proof for the vehicle data that you should provide.

You will have to register:

The **Vehicle Registration Certificate (VRC)** must always be uploaded. Without it, your registration cannot be validated and you are not compliant with Belgian toll regulations.

The Czech Republic uses multiple older versions of the VRC. Please follow the instructions related to the correct version of the VRC. A VRC may not always contain the necessary information or proof for the data you have to provide. Without sufficient proof, you may be charged the highest rate or the OBU may be disabled. If the VRC does not provide sufficient details or proof, it is important that you consult other documents to find this information. Your technical file will be sufficient as additional proof.

The documents that are accepted for the Czech Republic are (apart from the Vehicle Registration Certificate):

•	The Technical File	.10
•	The Certificate of Conformity	11
•	The Manufacturer's plate	12
•	The EURO Certificate	12

Upload the documents that provide proof of the values entered. **ALL DOCUMENTS** used for information during registration **MUST BE UPLOADED IN A RUP OR SCANNED AT A SERVICE POINT**. Only then Satellic will be able to validate the data you have entered. By uploading the correct documents you avoid paying too much toll.

AN OBU IS REQUIRED IF THE TRACTOR UNIT HAS A GROSS VEHICLE WEIGHT OF OVER 3.5 TONNES OR FOR SEMI-TRAILER TRACTORS OF N1 CATEGORY WITH A BODY CODE BC, REGARDLESS OF THEIR WEIGHT.

1. The data you have to register

1.1 The Vehicle's Country of Origin

The vehicle's Country of Origin is the country in which your vehicle is registered. It is also the country that has issued your VRC.

1.2 The License Plate Number

The license plate number (LPN) can be found on every VRC. You need to upload the VRC and the correct LPN to comply with regulations for Belgian toll roads.

1.3 The Gross Combination Weight Rating

Yes

Take F.2

The field **GROSS COMBINATION WEIGHT RATING** (GCWR) must state the value of the combination

There are several factors to consider when looking for the correct weight of your vehicle. If your vehicle cannot tow a trailer you cannot simply register the Gross Vehicle Weight (GVW: F.1 or F.2 on the VRC). You must prove that your vehicle cannot tow and that the GVW is the maximum permissible weight of your vehicle, using the accepted documents. If you are unable to do so, you will be charged the highest rate. You can prove that your vehicle cannot tow by:

- Indicating that the GCWR (F.3) on your VRC is equal to the GVW (F.1) on your VRC.
- Indicating that the Gross Trailer Weight (GTW; found in field O.1 on the VRC) is "0", "N.A.", "---" or something similar.

Start F.3 equals GCWR (Gross Combination Weight Rating) VRC = Vehicle Registration Certificate VRC & illed in Yes F.3=F.1? Other proof VRC & Yes F2 n VRC & GCWR illed i filled i

Take F.1+O.1

Take F.2+O.1

Please use the overview below to help you define the "Gross Combination Weight Rating" of your vehicle.

Yes

Yes

GCWR

some

Take F.2

Take F.3

Take GCWR

An empty GCWR or GTW field is not sufficient as proof that you cannot tow, because these are optional fields. You can leave them empty even if your vehicle can tow.

Keep in mind that if you have an adjusted GVW, this will be indicated in field F.2. In that case you must use F.2 instead of F.1 when referring to your GVW. This does not imply that you can ignore your F.3 weight if you have an F.2 weight.

If your vehicle **can tow**, the GCWR must be provided. This is the combination of the vehicle and the trailer. This is the F.3 value, which you can find on the VRC. If you are **unable to find the GCWR** (F.3) on your VRC, you can look for the GTW (O.1) and add this weight to the GVW (F.1) or the adjusted GVW (F.2) if this contains another weight.

If you are **unable to find the GTW** (O.1) on your VRC you can find it on another document (which you must also upload during registration). Your GCWR will be on your <u>Certificate of Conformity</u> (p.11) or <u>Manufacturer's plate</u> (p.12).

1.4 The Emission Class

Emission standards

Vehicle registration papers without Euro class

If the emission class is not specified on the vehicle documents, the tax authority uses the following table. Here you will find the category you should use when registering your vehicle. When you know your truck belongs to a better category, you need to request the truck manufacturer a certificate proving the emission class.

	EMISSION STANDARDS FOR VEHICLES OF CATEGORY N1			
[€ / km]	DATE OF THE FIRST REGISTRATION OF THE VEHICLE IN BELGIUM OR ABROAD EMISSION STANDARD			
Euro 1	1 October 1994 - 31 December 1997			
Euro 2	1 January 1998 - 31 December 2001			
Euro 3	1 January 2002 - 31 December 2006			
Euro 4	1 January 2007 - 31 December 2011			
Euro 5	1 January 2012 - 31 August 2016			
Euro 6	1 September 2016 - a date to be set by the minister			

FOR VEHICLES OF CATEGORY N2					
DATE OF REGISTRATION OF THE VEHICLE AT HOME OR ABROAD	EMISSION NORM				
As of 1 October 1993 until 30 september 1996 included	Euro I				
As of 1 October 1996 until 30 september 2001 included	Euro II				
As of 1 October 2001 until 30 september 2006 included	Euro III				
As of 1 October 2006 until 31 december 2011 included	Euro IV				
As of 1 January 2012 until 31 augustus 2016 included	Euro V				
As of 1 September 2016	Euro VI				

FOR VEHICLES OF CATEGORY N3					
DATE OF REGISTRATION OF THE VEHICLE AT HOME OR ABROAD	EMISSION NORM				
As of October 1 1993 until September 30 1996 included	Euro I				
As of October 1 1996 until September 30 2001 included	Euro II				
As of October 1 2001 until September 30 2006 included	Euro III				
As of October 1 2006 until September 30 2009 included	Euro IV				
As of October 1 2009 until December 31 2013 included	Euro V				
As of January 1 2014	Euro VI				

Emission standards

for tractors and off-road vehicles

WHEN PHASES OR TIERS ARE NOT INDICATED ON THE REGISTRATION DOCUMENTS OF THE OFF-ROAD VEHICLE						
DATE OF REGISTRATION OF THE VEHICLE AT HOME OR ABROAD	EMISSION STANDARD	EMISSION STANDARD	EMISSION STANDARD KMH			
As of January 1 1999 until December 31 2001 included	Phase I		Euro I			
As of January 1 2002 until December 31 2005 included	Phase II		Euro II			
As of January 1 2006 until December 31 2010 included	Phase Illa	Tier 3	Euro III			
As of January 1 2011 until December 31 2013 included	Phase IIIb	Tier 4i	Euro V			
As of January 1 2014	Phase IV	Tier 4	Euro VI			

The emission class is the European emission standard of a vehicle. Those emission classes will be registered as follows: EURO <number>.

In case your emission class is not shown on your vehicle registration certificate, the table above should be consulted to determine your minimum emission class.

For example: you have a vehicle which was first registered on 27 September 1989, then choose "EURO 0". When you have a vehicle which was first registered on June 28, 1999, select 'EURO II'

In case your vehicle has a different emission class than shown in the table, one of the following documents should be sent along with your vehicle registration certificate:

- A \(\) The Registration Certificate or
- B \(\text{Certificate of Conformity or } \)
- C ◊ EURO Certificate

2. Finding Data

Most data can be found on the VRC:

- The Country
- The LPN
- The GCWR

Otherwise you can find the GCWR on:

- o The Technical File
- The Certificate of Conformity
- o The Manufacturer's plate
- The Emission Class

Otherwise you can find the Emission Class on:

- o The Certificate of Conformity
- The <u>EURO Certificate</u>

3. Detailed breakdown of the accepted documents

The following pages give a detailed description of the documents that Satellic accepts as proof. Please check your documents and use the description below to find the necessary information. (Please keep in mind that not all of these documents must be provided, only the VRC and other documents that prove the values you provide are mandatory).

3.1	Current version of the Vehicle Registration Certificate (from 2005)	6
3.2	How to find the required data on the VRC	7
\checkmark	Licence plate number	7
\checkmark	Weight	7
\checkmark	Emission Class	9
3.3	Technical File	. 10
3.4	Certificate of Conformity	. 11
3.5	Manufacturer's plate	. 12
3.6	EURO Certificate	. 12
3.7	Older versions of the VRC	. 13
3.8	Older versions of the Technical Fiche	. 15

Please make sure to **UPLOAD** a scanned copy or photo of **EVERY DOCUMENT** you have used to register the mandatory data. Without them, your registration will not be approved.

Note that the VRC is ALWAYS REQUIRED!

If you provide **INSUFFICIENT** proof to Satellic, you will be charged the highest rate until all proof is presented.

3.1 Current version of the Vehicle Registration Certificate (from 2005)

If your vehicle was last registered in or after 2005, your registration certificate will look like this:

If you have another version of the VRC, it will look like the <u>Older versions of the VRC</u> (p.13). In both cases, follow the steps shown under 3.2 to determine your licence plate number, weight and emission class.

3.2 How to find the required data on the VRC

✓ Licence plate number

Your licence plate number (LPN) is on the front of your document, next to A.

√ Weight

• STEP 1. Look for 4 fields separated by "/", on the back of your document. The last one is F.3 (GCWR).

• STEP 2. Check the GCWR (F.3) against the GVW, which you will find on the back of your document. Look to the first two numbers (F.1 and F.2).

• STEP 3. If you weren't able to find the GCWR in STEP 1, look for O.1 on the back of the VRC.

• STEP 4. Add the GTW (O.1) to the GVW. Go to the back of your document and look for fields F.1 and F.2 (the first two numbers separated by "/")

• STEP 5. If F3 and O1 on the front side of your document are empty, you need additional documents to prove your weight.

If you find the GCWR on one of these documents, do not forget to CHECK THE GCWR AGAINST THE GVW as described in STEP 2 (p.8)!

See <u>Technical File</u> (p.10), <u>Certificate of Conformity</u> (p.11) or <u>Manufacturer's plate</u> (p.12).

✓ Emission Class

You will not be able to find your Emission Class on the VRC. You will need additional documents to prove your Emission Class.

See Technical File (p.10), Certificate of Conformity (p.11) or EURO Certificate (p.12).

If your vehicle registration certificate is the MOST RECENT one, it is likely that after these steps you will have found Country, LPN and GCWR, except the Emission Class. You will still need to look up and register the Emission Class, using the <u>Technical File</u> (p.10), the <u>Certificate of Conformity</u> (p.11) or <u>EURO Certificate</u> (p.12), before you can return to your registration.

If your vehicle registration certificate is an **OLDER VERSION**, check the <u>Older versions of the VRC</u> (p.13), where you will find images of all older versions with instructions (if any) on how to go through the steps described above.

If you have **NOT FOUND** all of the data needed for registration, please consult the documents below (<u>Technical File</u> (p.10), <u>Certificate of Conformity</u> [p.11] and <u>Manufacturer's plate</u> [p.12]).

3.3 Technical File

The technical file may be used to establish the Emission class. It may also be used as an alternative document to establish your vehicle's weight.

There are several versions of the Technical File. The most recent one (after 2005) will look like this:

If you have another version of the Technical File, check the <u>Older versions of the Technical Fiche</u> (p.15). In both cases, return here and follow the same steps as for the current version.

In order to find your Emission Class:

Look at field "V.9 Předpis EHK OSN č". You will find it in the category "Emise". If you see "Euro" followed by a number, you must enter this as your Emission Class. If you find a different value here, check the 4.1Emission Class conversion table (p.18).

In order to find your Weight:

Look at field "18 Největší technicky přípustná/F.3 povolená hmotnost jízdní soupravy [kg]". You will find it in the category "Hmotnosti".

3.4 Certificate of Conformity

The Certificate of Conformity is issued by your vehicle manufacturer. It will be similar to the one below:

The document contains the following fields:

	Issued before or in 2009	Issued in or after 2009		
GCWR	Field 18	Field 17.4		
Emission Class	Field 46.1*	Field 47		

^{*}This field contains a code. Look this up in the 4.1Emission Class conversion table (p.18) to find your Emission Class

Please do not forget to CHECK THE GCWR AGAINST THE GVW as described in STEP 2 of finding the Weight (p.8)!

3.5 Manufacturer's plate

The manufacturer's plate or VIN plate is a metal plate attached to the framework of your vehicle. It mentions the VIN number of the vehicle, but also the weight values of the vehicle. This plate is made by your vehicle manufacturer. It should be similar to the one below:

This plate should have the same format throughout Europe. It usually features two columns with weights. The left column represents the national weights, the right column represents the technical weights. You should always register the higher value (in most cases it will be the value in the column on the right). The second row is the value right above the axle weights and always contains the GCWR.

Please do not forget to CHECK THE GCWR AGAINST THE GVW as described in STEP 2 of finding the Weight (p.8)!

3.6 EURO Certificate

The EURO Certificate is a certificate stating your vehicle's Emission Class. It is mandatory for ECMT (or CEMT) transport. Its language may vary but it always looks like this:

The box at the top of the page shows your vehicle's Emission Class (the relevant box is ticked).

3.7 Older versions of the VRC

Older version 1 (from 2001)

The LPN (A), GVW (F.2) and GTW (O.1) can be found on the document, much like on the most recent version of the VRC (described above).

The Emission Class (V.9) cannot be found on this document. Please provide a <u>Technical File</u> (p.10), Certificate of Conformity (p.11) or <u>EURO Certificate</u> (p.12).

If you are unable to provide any of these documents, look for the date of 1st registration (B. Datum první registrace nebo rok výroby) and check your Emission Class in the <u>4.1Emission Class</u> conversion table (p.18).

Older version 2 (from 1994)

The LPN, GVW and the GTW can all be found in the document. However, they are not marked with the usual field codes. Therefore look for:

Field	EN	CZ
Α	LPN (License Plate Number	Statní poznávací značka
F.1	GVW (Gross Vehicle Weight)	Hmotnost [kg]: - celková (the second number)
0.1	GTW (Gross Trailer Weight)	Max. Hmotnost přivěsu [kg]: - brzděného (the second number)

The Emission Class (V.9) cannot be found in this document. Provide therefore a <u>Technical File</u> (p.10), Certificate of Conformity (p.11) or <u>EURO Certificate</u> (p.12).

If you cannot provide any of these documents, look for the date of 1st registration and look up your Emission Class in the 4.1Emission Class conversion table (p.18).

Older version 3

Only the LPN and GVW can be found:

	Field	EN	CZ
	Α	LPN (License Plate Number	SPZ (A)
ſ	F.1	GVW (Gross Vehicle Weight)	celková

The correct Weight and the Emission Class cannot be found on this version.

Please provide a <u>Technical File</u> (p.10), Certificate of Conformity (p.11), <u>Manufacturer's plate</u> (p.12), and/or <u>EURO Certificate</u> (p.12).

If you are unable to provide a document stating the Emission Class, look for the date of 1st registration ("Datum (B)") and check your Emission Class in the <u>4.1Emission Class</u> conversion table (p.18).

3.8 Older versions of the Technical Fiche

THE CHINICAL PRUISES AND THE CHINICAL PRUISES

Older version 1 (from 2001)

The values you must register are the same ones as in the current version. Only the numbers differ. In order to find your **Emission Class**:

Look for field "16 Předpis EHK OSN č". You will find it in category "Emise".

If you see "Euro" followed by a number, you must enter this as your Emission Class.

If you find a different value here, check it in the <u>4.1Emission Class</u> conversion table (p.18). (p.18). In order to find your **Weight**:

Look for field marked with "41 Největší technicky přípustná/povolená hmotnost jízdní soupravy [kg]". You find it in category "Hmotnosti".

Older version 2 (from 1994)

In order to find your **Emission Class**:
Look for field "EHK č." or "EU č". You find it in category "Emise".
If you see "Euro" followed by a number, you must enter this as your Emission Class.

If you find a different value here, check it in the 4.1Emission Class conversion table (p.18).

In order to find your Weight:

Look for field "12 Celková hmotnost jízdní soupravy [kg]".

In order to find your **Emission Class**:

Look for field "EHK" on page 5. You will find it in category 13. If you see "Euro" followed by a number, you must enter this as your Emission Class.

If you find a different value here, check it in the 4.1Emission Class conversion table (p.18).

In order to find your Weight:

Look for field "12 Celková-okamžitá hmotnost jízdní soupravy".

4. Appendices

4.1Emission Class conversion table

The Emission Class should be registered in the following format: EURO <number>. The reference to the Emission Class which is stated on your documents, may, however, be formulated in a different way.

1. The Emission Class code will often have the following format:

88/77/EEC*2001/27A EC

2001/27A EC

When two codes are mentioned, they are usually separated by an asterisk (*). You can find the first code in the left column of the table below (e.g. 88/77, as in the example above). The letters in this code can be ignored (e.g. EEC, as in the example above). These letters are merely a reference to the European Economic Community/European Commission. The row that contains the first code (e.g. 88/77), also contains the second code that follows the asterisk (2001/27A EC, as in the example above). It is also possible that the code before the asterisk is not mentioned. In that case, you will only find the second code that follows the asterisk. The codes are sorted by year, followed by ascending numbers. When the year/number is followed by a letter, that letter is important to note, as it may determine your vehicle's Emission Class. The symbol " \emptyset " indicates that the code is not followed by a letter. In the table below, the code 2001/100 \emptyset , A indicates two codes: 2001/100 \emptyset (code only) and 2001/100 A (code + letter A). Sometimes, it is the fuel type of your vehicle ("diesel", "petrol", as in the table below), which will determine your Emission Class.

2. In some cases, the Emission Class code may be stated in a totally different way, without a year/number or a number/year:

UN-ECE R49.05A

49-R-05A

In those cases, your code will contain a single letter R, which is preceded or followed by the number "15", "24", "49", or "83" (e.g. "R49" and "49-R", as in the two examples above). That is your primary code. The secondary code starts with a zero (0) and is often followed by a letter (e.g. 05A, as in the example above). Once you have found your primary R-code on your documents, you will find the corresponding secondary code in the corresponding row "R15", "R24", "R49", or "R83" in the table below. The header of the column which contains your secondary "0-code" indicates your Emission Class in the standardized "EURO <number>" format (e.g. EURO 3, as in the example above). All examples above are for Emission Class EURO 3.

<u>IMPORTANT:</u>

Austria, Denmark, Germany, Hungary, Italy, Norway, Sweden and Switzerland often use non-standard, local codes. These codes are not included in the table below. They may be a single-digit number, e.g. "3", which should not be interpreted as "Euro 3".
